

Science-Policy-Practice Links

With the establishment of platforms like the Inter-governmental Committee on Climate Change (IPCC) and Inter-governmental Platform on Biodiversity and Ecosystem Services (IPBES) the focus on establishing science-policy-practice links for national and global policy making has been further strengthened.

Activities under this Programme Area focuses on supporting stakeholders, including Government agencies in policy making that is responsive and responsible using science-practice experiences. Recent activities such as supporting Department of Environment and Natural Resources (DENR), Government of Philippines to deliver on the twelfth meeting of Conference of Parties of Convention on Migratory Species (CMS-COP 12), developing an assessment paper on regulatory options for pricing and market for genetically modified crops and the like.
